

CHLORHEXIDINE WASH CLOTHS

Clinell Chlorhexidine Wash Cloths are ideal for use in the critical care setting.

2% Chlorhexidine gluconate reduces potentially harmful bacteria found on skin by binding and forming an invisible barrier against germs, providing up to six hours residual protection.

Containing moisturisers and Vitamin E to promote healthy skin, Clinell Chlorhexidine Wash Cloths improve patient cleanliness, help to limit the transfer of pathogens and provide an extra level of protection. They can be used cold or warmed.

Clinell Chlorhexidine Shampoo Caps are also available.

Clinell Chlorhexidine Wash Cloths
Pack of 8 – CHGWC8 (Single use)

DIRECTIONS

Clinell Chlorhexidine Wash Cloths contain 8 large cloths per pack. These are for single patient use only. Avoiding mucous membranes, use one wipe per area of the the patients' body to cleanse and disinfect as shown below. Allow to air dry. Skin will feel sticky for a short period as the Chlorhexidine binds to it.

NECK & TORSO

Wipe 1. Neck (chin, down) and torso.

BACK

Wipe 2: Back.

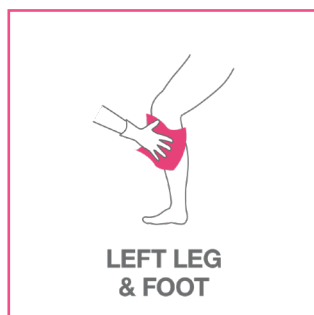

**LEFT ARM
& AXILLA**

Wipe 3: Left arm and axilla.

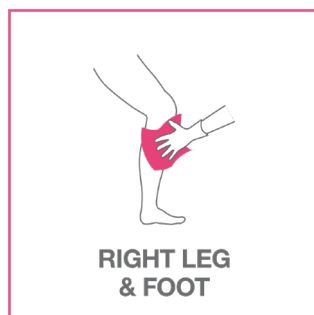

**RIGHT ARM
& AXILLA**

Wipe 4: Right arm and axilla.

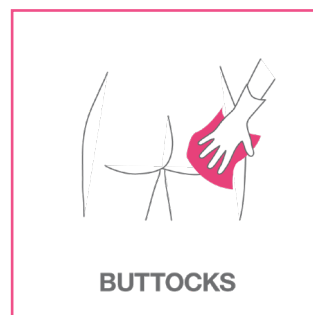

**LEFT LEG
& FOOT**

Wipe 5: Left leg and foot.

**RIGHT LEG
& FOOT**

Wipe 6: Right leg and foot.

BUTTOCKS

Wipe 7: Buttocks.

GROIN

Wipe 8: Groin and perineum.
