

# SafeMatrix®

Single Use Matrix Band

# Get with the Times

**Make reprocessing and assembling matrix bands a thing of the past.**

Increase workflow efficiency and gain more time to spend on patient care with ready-to-use SafeMatrix bands. For all MO/OD and MOD cavities, cusp build-ups, or as a protective shield for neighboring teeth during preparation, simply place, tighten, and restore.

 **REQUEST YOUR FREE SAMPLE!**

**Now available with mylar band**

# Reduce the risk of cross contamination with single-use matrix bands.

Save time and effort and reduce cross contamination by eliminating the need to clean, sterilize, and assemble reusable matrix bands. May be used with all restorative materials and with wedges and rubber dams.

Push-button diverter creates band angulation allowing for tighter interproximal contours.

Available in stainless steel and mylar band options for easy penetration of UV light for curing and increased visibility of composite.

Narrow neck and rounded edges provide easier access to posterior regions.
